

## Checkout v3 API Integration Checklist

Partner name: \_\_\_\_\_

Merchant Serial Number: \_\_\_\_\_

Description of the solution: \_\_\_\_\_

Checkout API endpoints to integrate	Your Reference ID
<i>See the <a href="#">Checkout API quick start guide</a> for examples.</i>	
Create session - <a href="#">POST:/checkout/v3/session</a>	
Get details - <a href="#">GET:/checkout/v3/session/{reference}</a>	
Callback - <a href="#">POST:[callbackPrefix]/checkout/{version}/order/{orderId}</a>	

ePayment API endpoints to integrate	Your Reference ID
<i>See the <a href="#">ePayment API Quick Start guide</a> for examples.</i>	
Get payment details - <a href="#">GET:/epayment/v1/payments/{reference}</a>	
Full and partial <i>capture</i> payment - <a href="#">POST:/epayment/v1/payments/{reference}/capture</a>	
Full and partial <i>refund</i> payment - <a href="#">POST:/epayment/v1/payments/{reference}/refund</a>	

Quality assurance	Your comments
<b>Handle callbacks</b> <p>Correctly handle callbacks from Vipps MobilePay, both for successful and unsuccessful payments. See the API documentation for <a href="#">how callback URLs are built</a>, make test calls to make sure you handle the POST requests correctly. We do not have capacity to manually do this for you.</p>	
<b>Handle errors</b> <p>Make sure to log and handle <a href="#">all errors</a>. All integrations should display errors in a way that the users (customers and merchant employees/administrators) can see and understand them.</p>	
<b>Include HTTP headers</b> <p>Send the <a href="#">HTTP headers</a> in all API requests for better tracking and troubleshooting (mandatory for partners and platforms, who must send these headers as part of the checklist approval).</p>	
<b>Add information to the payment history</b> <p>We recommend using the <a href="#">Order Management API</a> to add receipts and/or images to the payment history. This is a great benefit for the end user experience. It is also mandatory for merchants using <a href="#">Content monitoring</a>.</p>	

Avoid integration pitfalls	Your comments
<b>Send a useful reference id</b> Follow our <a href="#">reference recommendations</a> .	
<b>Poll for payment details</b> The Merchant <i>must not</i> rely on <code>returnUrl</code> or <code>callback</code> alone, and must poll Payments Details <a href="#">GET:/epayment/v1/{reference}</a> or Session Details <a href="#">GET:/checkout/v3/{reference}</a> . For pure payment status, polling the ePayment API is recommended. Follow our <a href="#">polling recommendations</a> .	
<b>Handle redirects</b> The merchant must handle that the <code>returnUrl</code> URL is opened in the default browser on the phone, and not in a specific browser, in a specific tab, in an embedded browser, requiring a session token, etc. Follow our <a href="#">recommendations regarding handling redirects</a> .	
<b>Complete capture before expiration date</b> For <a href="#">reserve capture</a> payments, ensure to complete captures before the reservations expire. Once a reservation is expired it is no longer possible to capture.	
<b>Follow the design guidelines</b> The Vipps MobilePay branding must be according to the <a href="#">design guidelines</a> .	
<b>Educate your customer support</b> Make sure your customer support has all the tools and information they need available in <i>your</i> system, through the APIs listed in the first item in this checklist, and that they do not need to visit <a href="https://portal.vippsmobilepay.com">portal.vippsmobilepay.com</a> for normal work.	
Partner checklist	Your comments
As a partner, you accept the <a href="#">Partner terms and conditions</a> .	
Provide technical documentation for merchants for the following:	
- How to apply for products (a URL, plain text or PDF is preferred)	
- How to configure and use the solution (a URL, plain text or PDF is preferred)	
- Frequently Asked Questions (FAQs) for merchants (a URL, plain text or PDF is preferred)	
Provide one pilot customer to verify the integration in the production environment (send organization number and name).	
Describe how your integration has been set up, with a link to a demo, or provide screenshots (PDF is preferred).	

Partners, please send your checklists to [developer@vippsmobilepay.com](mailto:developer@vippsmobilepay.com). Include example reference IDs from the test environment, pilot customer info, and a description of the implemented solution.

We will verify the integration and contact you. After the checklist is approved, you'll receive all necessary information from [partner@vippsmobilepay.com](mailto:partner@vippsmobilepay.com).
